Full Coverage— Older Siblings in Puberty

Last year Jan, Jasper's older brother, was not much different from Jasper. Of course, Jan has always been bigger than Jasper. But he has the same dark hair and the same brown eyes as his brother. For some time now, however, Jan has begun to change more and more.

His shoulders are wider. Suddenly he's getting pimples. A delicate dark fluff is growing on his upper lip. His penis is getting bigger, and dark, curly hairs have started to grow around it. Jasper finds Jan's voice most interesting. Sometimes it is deep and then, suddenly, it gets high again. From his dad, Jasper knows this is referred to as one's voice breaking. If he laughs about it, Jan gets angry.

Figure 1

Stella's older sister, Nora, is in the same grade as Jan. And she's changing, too. If Stella sees her sister showering, she is pretty amazed. Nora now has breasts. "Not so small, either," Stella thinks. Nora's hips are wider and she's growing red pubic hair. She also gets pimples every now and then. When that happens, she doesn't want to go

to school at all. Once a month, Nora gets her period. A bit of blood flows from her vagina and sometimes it also hurts her stomach. Stella's mother gives her a heating pad.

Figure 2

“Marco is a great guy,” Toby thinks. When he grows up, he wants to drive as nice a motor scooter as Marco. Secretly, he imagines himself racing around with Serafina riding on the back.

Sabrina and Marco kiss often. “All the time,” thinks Toby.

And they also sleep together. Sabrina told Toby so.

They snuggle together for a long time. They kiss each other all over their bodies. Behind the ears, on the neck, on the chest and stomach, even on the bum and between the legs. Sabrina’s vagina becomes moist and warm and Marco’s penis gets very stiff. Marco then pushes his penis into Sabrina’s vagina. Always in and out. That feels great for both of them. When the feeling is nicest, Marco’s penis sprays semen into Sabrina’s vagina.

“That’s how you get babies,” Toby said.

“You guessed it, little brother,” Sabrina said, and tousled Toby’s hair.

Women take birth control pills to prevent the fertilization of an egg.

The IUD is inserted into the uterus. It prevents a fertilized egg from attaching to the uterine lining.

The diaphragm is a rubber cap that is slipped around the cervix. That’s how it keeps sperm from entering the uterus.

Contraceptive foam caps are inserted into the vagina. The foam forms a barrier against the semen.
